FOREWORD

VERY IMPORTANT

An Added Service

We have just completed a very large refrigerated cellar where proper temperature and humidity is scientifically maintained. This will enable us to supply you dormant (full of energy) deciduous material for very late spring planting.

This service will ensure good planting results and there will be no extra cost to you.

Many of our heavily budded *Magnolia soulangeana* (See Page 28) will be held dormant to lengthen your selling season by many weeks.

Make Princeton headquarters for your requirements and make more money.

Our general line is quite complete but because of heavy demands we would suggest that you make commitments covering your complete requirements at your earliest convenience.

NOTES IN EXPLANATION OF CATALOGUE

The figures following each variety indicate in feet the approximate height of that plant at maturity. Ample allowance has been made for the many physical factors that tend to modify the growth of plants in cultivation.

The botanical and common names are largely taken from the 1924 edition of "Standardized Plant Names." Changes in nomenclature according to the revised "Second Edition," which have not become generally familiar to the trade, are shown in parenthesis and cross-indexed for reference.

Our standard of grading all plants is based on a schedule which has been adopted by the American Association of Nurserymen.

To facilitate the handling of orders and to enable us to render you quicker and better service we desire where possible, especially in deciduous material, that orders be made in multiples of 10. Many varieties are tied in 10's when graded. Your cooperation will be appreciated.
